

The front and rear mudflaps protect the bottom of the car body from scratches, splashes and loose chippings.

With the wind deflectors, you can drive with the windows down without the inconvenience of draughts.

In the event of an incident while driving, the safety kit (warning triangle, jacket and first aid kit) ensures your safety. It can also include a fire extinguisher.

MULTIMEDIA

The i-pod connection means that you can listen to music from your walkman via the original car radio in your vehicle. You can control your walkman using the steering wheel controls.
Not compatible with the Carminat navigation system or the Cabasse radio.

The Audio Connexion Box gives you even more options for connecting your digital walkman to the car radio in your vehicle! The USB and iPod sockets mean you can listen to your walkman and navigate using the remote controls under the steering wheel, while the jack socket allows you to connect any audio source.

The 6 CD - MP3 changer is compatible with the original car radio and can be controlled using the steering wheel controls.

Thanks to its perfect integration, the Bluetooth® (CMLTb) hands-free telephone controls enable you to manage your telephone calls using the car radio instrument panel controls and display in your vehicle.
Not compatible with the Carminat navigation system or the Cabasse radio.

Ceiling video system: with a folding wide screen fixed to the ceiling, long journeys seem shorter. Your children can watch their favourite films or connect a games console.
Not compatible with the sunroof option.

To save time and make your journey easier, the portable navigation system calculates and displays your route.

To update your vehicle's Carminat navigation system map database for access to roads in other countries, Renault offers a full range of update CDs.

SCENIC

Renault is pleased to offer you a wide range of accessories which will allow you to personalise your vehicle and adapt it to your lifestyle. Renault accessories are developed and tested by our engineers with regard to quality, safety and reliability in accordance with the rules of the trade. They are perfectly adapted to your vehicle both in technical and aesthetic terms.

ADVENTURE

The Euroway tow bar bicycle carriers can accommodate up to three bicycles while ensuring free access to the boot.

To maintain the aesthetics of the Scenic, the ball of the quick-release tow bar can be removed without the use of tools in only a few seconds.

The original Touring Line roof bars, in both the aluminium and steel, are specially adapted to the design of the Scenic. They can accommodate the Touring Line 480 roof box with a loading capacity of 480 litres or 75 kg.

The aluminium Proride bicycle carrier is fitted to the roof bars and can transport any bicycle with a frame measuring up to 80 mm.

Also fitted to the roof bars, the Schuss ski carrier can transport up to six pairs of skis, depending on the model.

When driving on snow-covered roads, the Trendy non-skid socks are easy to fit in only a few seconds.

EXTERIOR PERSONALISATION

Give your Scenic more personality with a sport exhaust with dual output and/or a profiled rear spoiler.

Tinted windows, specially adapted to the windows of the Scenic and Grand Scenic, protect your privacy in style! They also filter UV rays and increase the resistance of the windows to breakage.

Give your vehicle a classy, top-of-the-range look with brushed aluminium handles.

INTERIOR COMFORT

Adjustable to suit your driving position, the front central armrest is also a practical storage space.

The removable aluminium compartmentalised boot cargo container offers 35 possible combinations: store your belongings in separate compartments.

The waterproof boot cargo container enables you to transport wet or dirty objects. Easy to remove to be washed by water jet.

CHILD SAFETY

Designed for children between 9 months and 4 years, the King TS seat is fitted in the rear of the vehicle.

For older children (4 to 12), Renault offers the Kid Plus booster seat: an adaptive seat, it is suitable for your children throughout their childhood, providing optimum safety and comfort.

The convertible child head restraint and Ergos booster seat are specially designed to ensure complete safety and comfort for children in the rear side seats.

PROTECTION

Highly practical, the separating grille enables you to separate the boot loading zone from the passenger compartment.

By indicating the proximity of obstacles in front or behind your Scenic/Grand Scenic by means of an audible signal, the parking aid makes parking easy.

The boot back net can be used to hold objects in the boot, preventing them from moving around during transport.

The practical compartment tray under the parcel shelf can be used to store and protect small objects.

Providing additional storage space, the envelope and parcel shelf nets can be used to store small objects. The textile boot carpet protects the loading area.
